

How to add Edu tool to IntelliJ|PyCharm?

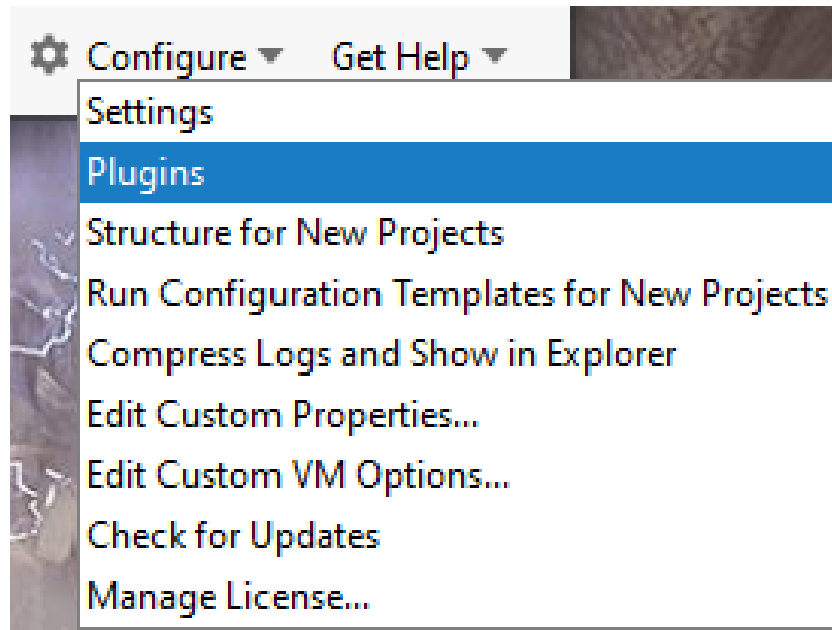

How to add Edu tool to IntelliJ|PyCharm?

We present instruction, how to step-by step run exercises for individual sessions in the IntelliJ/PyCharm environment with the addition of Edu tool. The instruction is prepared on the example of the IntelliJ environment. In case of PyCharm, please follow the same steps.

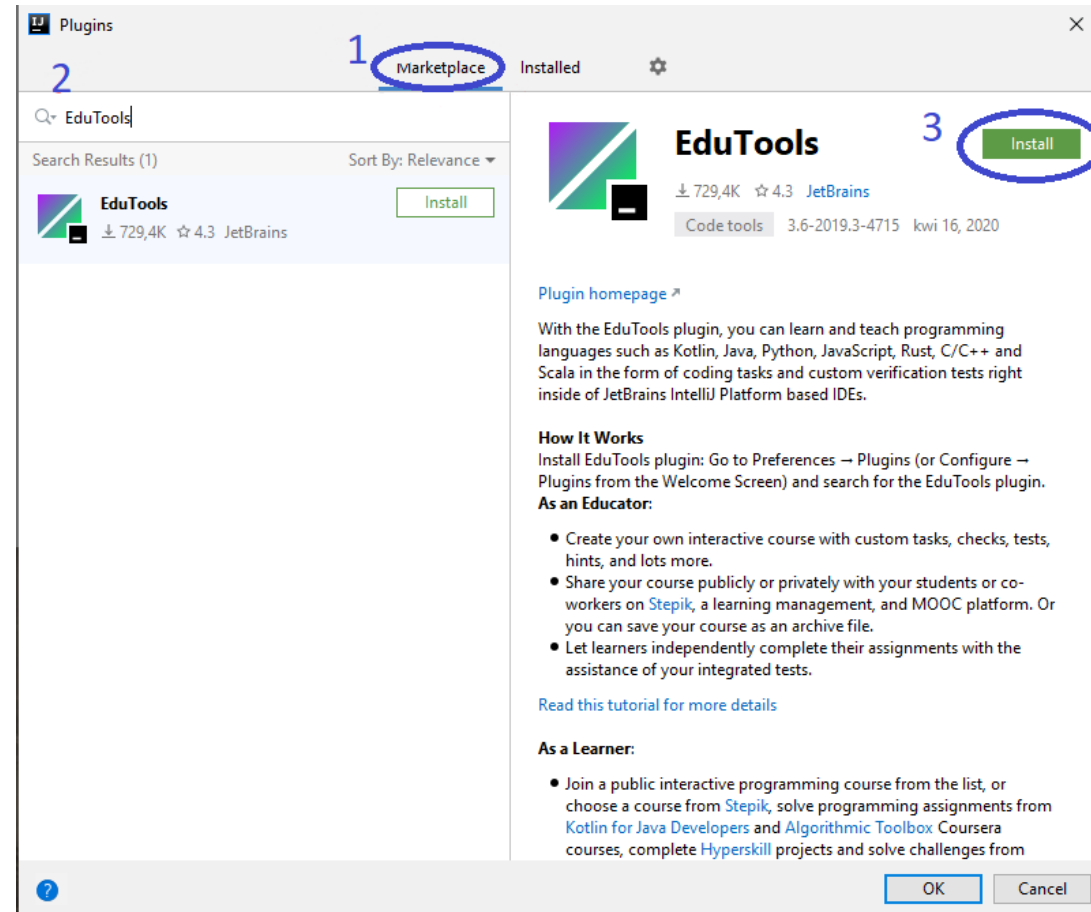

Run IDE and select Configure:

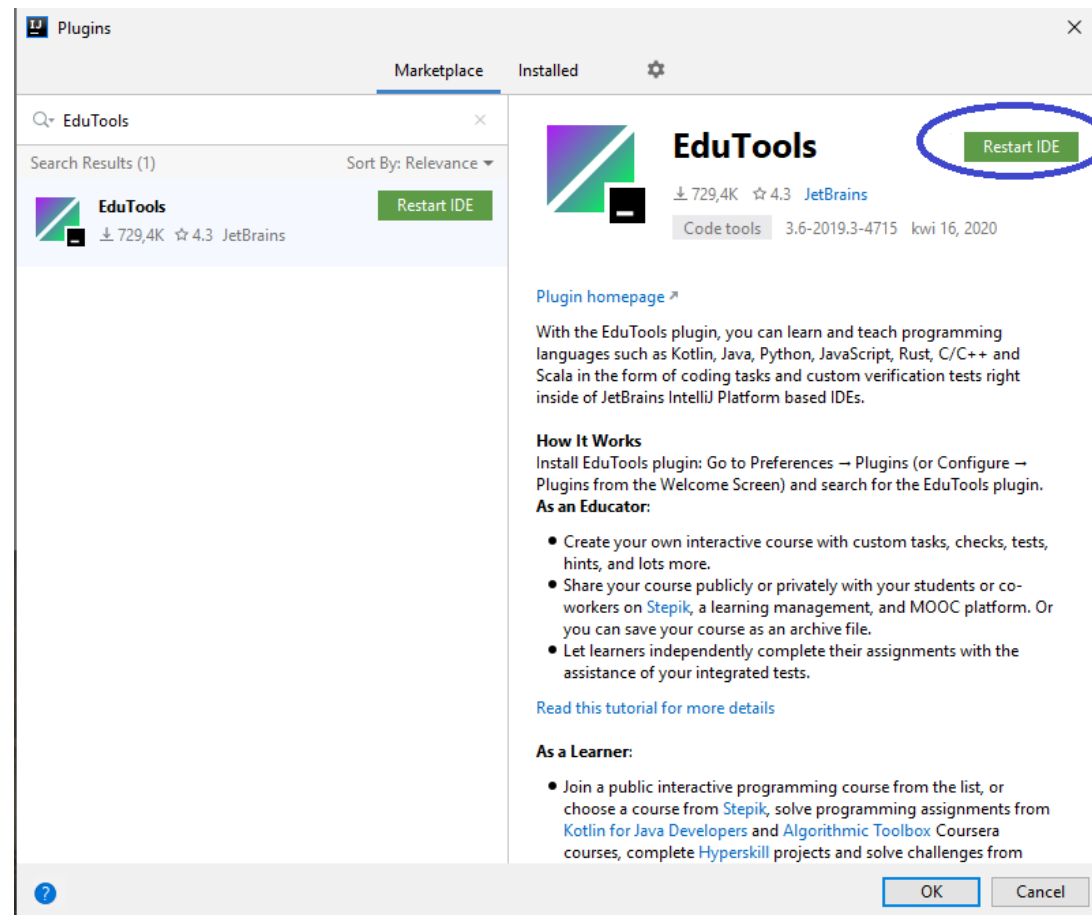

Next select Plugins

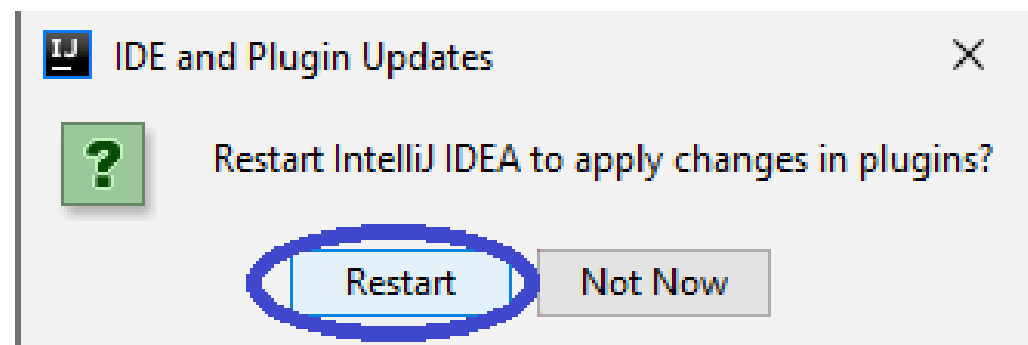

Then choose Marketplace, type in search EduTools, and then click Install

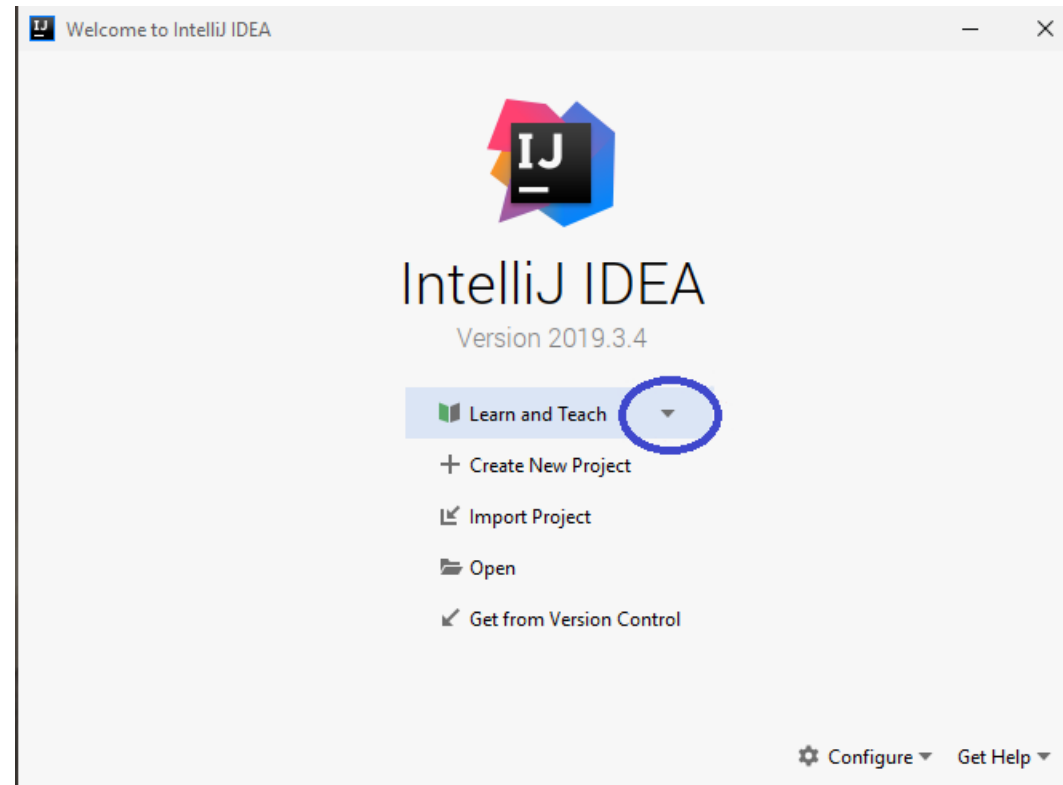

After installation click **Restart IDE**

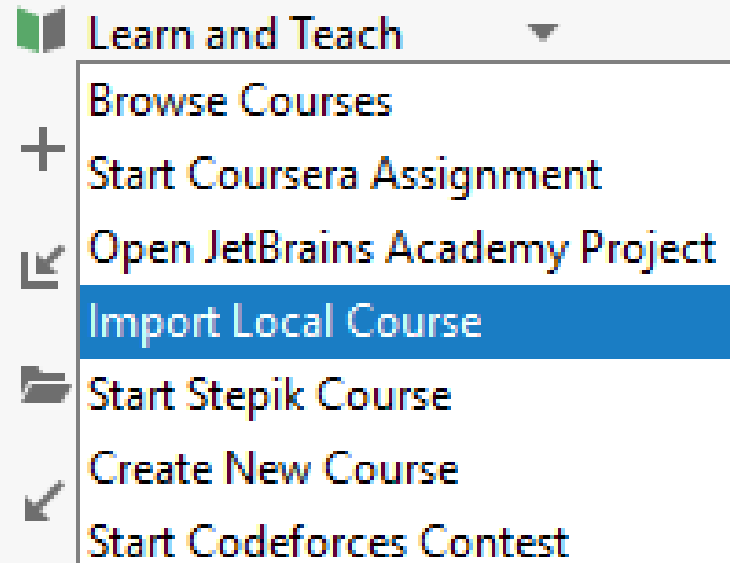

Choose **Restart**

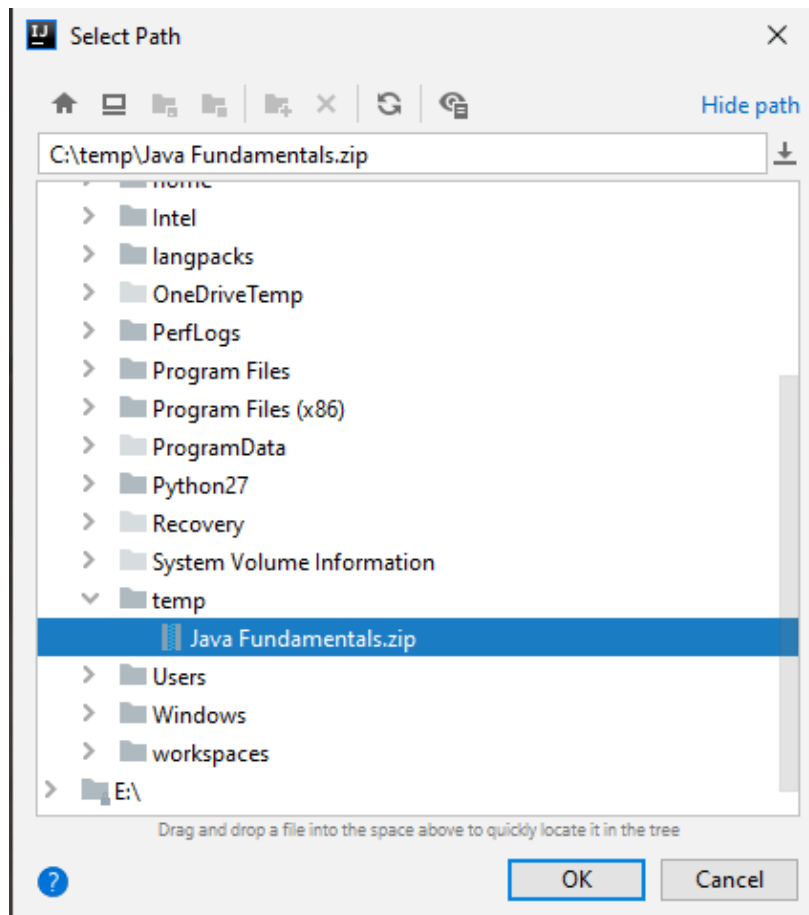

After a while you will see the option **Learn and Teach**. Click it

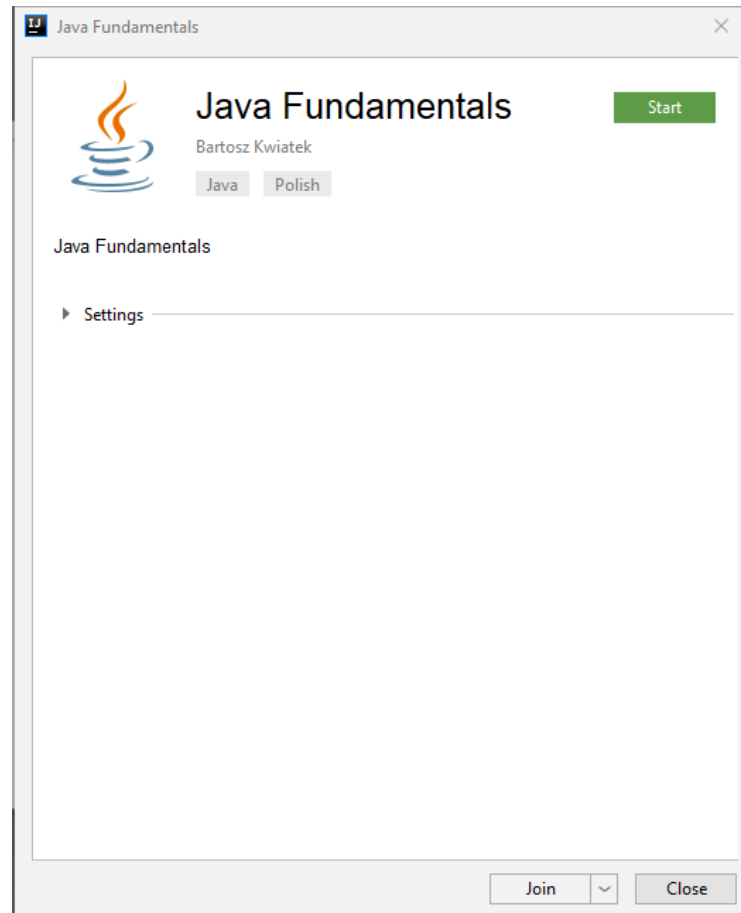

Choose option **Import Local Course**

Choose selected file. In this case it's "C:\temp", it can be a different path for you. After selected path click **OK**

You will see option:

It's almost done!

You can expand the list of **Settings** if necessary and set another location of JDK.

Then click **Join**.
